

SitaraTek

Fractional Executive Leadership (COO/CIO/CTO)

About Us

The word Sitara comes from Sanskrit and symbolizes the enlightenment and guidance represented by a rising star. These are the core principles we navigate by.

Our Mission

SitaraTek offers Fractional outsourced Executive, Technical, and Compliance leadership tailored for small to mid-sized businesses. We can support your team anywhere from a few hours a month to full-time resourcing on a project or long-term basis. We bring strategic vision, technical, compliance and security expertise, team building, communication, and proven success in driving innovation and efficiency for our clients.

SitaraTek stands out as a trusted and strategic partner for our clients. Our team has deep technical experience in both government and commercial spaces. At the strategic level we have experience with mergers and acquisitions, governance and risk management, compliance, budgeting and financial management, and project management. We have technical expertise in cloud computing, cyber security, artificial intelligence (AI), and Enterprise Architecture.

Detailed Services

Artificial Intelligence

Provide ideas and guidance in the use and security of AI tools as well as developing AI solutions.

Cybersecurity

Develop and implement cybersecurity policies, practices, and protocols to protect against threats and breaches, ensuring compliance with industry standards like ISO, NIST, and CMMC.

Strategic Planning

Align technology strategies with organizational and client objectives. Develop and execute technology roadmaps for project success.

Mergers and Acquisitions

Perform due diligence and technology assessments, integration strategy, financial modeling and budgeting, system readiness, security, and data mapping.

Compliance and Regulatory Adherence

Certification and compliance with ISO, CMMI, NIST, and CMMC standards, along with developing enterprise processes to meet industry regulations and data privacy laws.

Budgeting and Financial Management

Develop and manage budgets, allocate resources, and track expenses to ensure cost-effectiveness and alignment with strategic priorities.

Technology Assessment and Optimization

Conduct thorough assessments of existing technology infrastructure. Implement optimization strategies to enhance efficiency and reduce costs.

Government Contracting Experience

Leverage our extensive knowledge of government regulations, compliance, and procurement processes to support government contractors.
